

2007 Loomis and IPB mini Symposium

Theme: Long distance signaling

Date: April 2 & 3 (Monday and Tuesday), 2007

Venue: Pioneer Room, Memorial Union

Organizer: [Dr. David Hannapel](#)

Loomis Lecture (7 pm, Monday, April 2, 2007)

Dr. Bill Lucas

Distinguished Professor

University of California-Davis, USA

Title: The Plant Vascular System: An Information Superhighway

IPB mini-symposium speakers

[Dr. Takashi Araki](#), Professor

[Kyoto University](#), Japan

Title: *The role of FT (Flowering Locus T) in flowering*

[Dr. Biao Ding](#), Professor

[Ohio State University](#), USA

Title: *Probing Mechanisms of Systemic RNA Trafficking with Viroids*

[Dr. Salomé Prat](#), Professor

[Centro Nacional de Biotecnología-CSIC](#), Spain

Title: *Mobile signals involved in the control of tuberization in potato*

[Dr. Bill Lucas](#), Professor

[University of California-Davis](#), USA

Title: *Functional Analysis of Non-Cell-Autonomous Protein Trafficking Through the Phloem*
